INTERNSHIP DOMAIN: AI AUTOMATION

Day 23 — Multi-Tool Agents & MCP

List of tools + descriptions

#	Tool Name	Type	Description	Autonomy
1	calculator	Built-in tool	Pure arithmetic and math only	Autonomous
2	HTTP Request (get_exchange_rate)	API/HTTP tool	Gets the latest currency exchange rate between two ISO 4217 currency codes (e.g. USD, EUR, GBP). Inputs: <code>from_currency</code> , <code>to_currency</code> . Returns conversion rates. Used only for currency conversion — not for arithmetic (that's the calculator's job)	Autonomous, read-only
3	lookup_orders	Data-store tool (n8n Data Table)	Read-only lookup in the <code>customer_orders</code> data store, by <code>order_id</code> , <code>customer_email</code> , <code>product</code> , or <code>status</code> . Always used before answering any question about an order	Autonomous, read-only
4	update_order_status	Data-store tool (write)	Sensitive write that permanently changes an order's status in the data store, matched by <code>order_id</code>	Requires explicit human confirmation before executing
5	remote_mcp_tools	MCP Client Tool	Connects to the DeepWiki remote MCP server (https://mcp.deepwiki.com/mcp), exposing <code>ask_question</code> for answering questions about public GitHub repositories	Autonomous, read-only
