Day 11 — Multi-System Integration

The screenshot shows the HTTP Request tool interface. The **INPUT** section displays a JSON object with the following fields: `"Name": "Noor-ul-Huda", "Email": "noor@example.com", "City": "Karachi"`. The **Parameters** section shows the following configuration: Method: GET, URL: `https://api.agify.io`, Authentication: None, Send Query Parameters: ☒, Specify Query Parameters: Using Fields Below, and Query Parameters: `name`. The **OUTPUT** section displays a JSON object with the following fields: `"count": 1, "name": "Noor-ul-Huda", "age": 37`.

The screenshot shows the **Logs** and **Output** section. The **Logs** section shows the execution status: **Success in 14.372s**. The **Output** section displays the result in a table format:

count	name	age
1	Noor-ul-Huda	37
