Day 16 — Structured AI Output

JSON schema

```
{
  "type": "object",
  "properties": {
    "category": {
      "type": "string"
    },
    "priority": {
      "type": "string"
    },
    "sentiment": {
      "type": "string"
    },
    "department": {
      "type": "string"
    },
    "summary": {
      "type": "string"
    }
  },
  "required": [
    "category",
    "priority",
    "sentiment",
    "department",
    "summary"
  ]
}
```

SCREENSHOT

The screenshot displays the 'Structured Output Parser' interface, which is divided into three main sections: INPUT, SCHEMA, and OUTPUT.

INPUT Section: This section shows a table with 1 item. The table has two columns: 'action' and 'text'. The 'action' column contains the value 'parse', and the 'text' column contains a JSON string: `""json\n{\n "output": {\n "category": "Returns",\n "priority": "High",\n "sentiment": "Unhappy",\n "department": "Logistics",\n "summary": "Wrong product received, replacement requested"\n }\n}\n""`.

SCHEMA Section: This section is used to define the JSON schema for the input. It includes a 'Schema Type' dropdown set to 'Define using JSON Schema'. Below this is the 'Input Schema' section, which displays a JSON schema definition for an object with properties 'category', 'priority', 'sentiment', and 'department'. The schema is defined as follows:

```
{
  "type": "object",
  "properties": {
    "category": {
      "type": "string"
    },
    "priority": {
      "type": "string"
    },
    "sentiment": {
      "type": "string"
    },
    "department": {
      "type": "string"
    }
  }
}
```

Below the schema definition, there is a note: 'Use JSON Schema format (examples). \$refs syntax is currently not supported.' and an 'Auto-Fix Format' button.

OUTPUT Section: This section shows the result of the parsing process. It displays a JSON object with the following structure:

```
{
  "action": "parse",
  "response": {
    "output": {
      "category": "Returns",
      "priority": "High",
      "sentiment": "Unhappy",
      "department": "Logistics",
      "summary": "Wrong product received, replacement requested"
    }
  }
}
```
