How to reset your password

To reset your password, click "Forgot Password" on the login page, enter your registered email, and follow the link sent to your inbox.

docs.md

Supported vector databases

Our platform supports Supabase Vector, Qdrant, and Pinecone as vector store backends. All three offer generous free tiers for prototyping.

How chunking works

Long documents are split into overlapping chunks before embedding so that each chunk fits the model context window and preserves surrounding context.

[Integrations available](#)

Petalnex integrates with Slack, Gmail, Google Sheets, Notion, and hundreds of other apps through the n8n automation platform.

[glossary.txt](#)

[What are embeddings?](#)

Embeddings are numerical vector representations of text that capture semantic meaning, enabling similarity search and retrieval augmented generation.

[What is RAG?](#)

Retrieval Augmented Generation (RAG) combines a vector search over your knowledge base with a language model so answers are grounded in your own documents.
